-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed 11 January 2007 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. As indicated on the attached 1449 form, the cited Japanese document 06219474A has not been considered since no copy was provided.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 28-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith. Smith discloses a container including an outer substrate layer 306a and an inner shrink film layer 304a bonded to the outer layer at top and bottom seams. The shrink film is adapted to shrink away from the substrate upon application of heat to create a horizontal air pocket. Smith does not disclose formation of the container from a blank. Official notice is taken that it is well known to form layered containers from a laminated blank which is subsequently wound or rolled into a container shape. It would have been obvious to form the container of Smith using a laminated blank in view of the well known formation of containers from blanks in this art since laminated blanks can be stored and

shipped prior to assembly and are less costly than molding techniques such as injection molding or blow molding. With respect to claim 29, it is noted that the shrink film of Smith is considered capable or adapted to shrink away at a temperature range of 180-190 degrees in that any shrink film is capable of such shrinkage dependent upon the time of exposure to the claimed range. Therefor, no distinction is seen between the claimed film and that shown in Smith as a result of the claimed intended shrinkage temperature.

### *Conclusion*

In order to reduce pendency and avoid potential delays, Technology Center 3700 is encouraging FAXing of responses in Office Actions to (571)273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by Applicants who authorize charges to a PTO deposit account. Please identify the Examiner and art unit at the top of your cover sheet.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
